# Members' Galleries images:

All APS members are invited and welcome to submit images for their individual gallery on the Members' Galleries page of the web site.
These galleries are a great way for members to show their own images to the public and also to demonstrate the breadth & depth of the talent within APS.
Members can submit up to 8 images of their choice – they're not vetted at all.

The requirements for the images are:

- We will take up to 8 images from each person.

- We won't show letters after your name as long names upset the appearance of the page.

- Filenames will appear as captions. So:

  - Their filenames (without 'jpg') will be the titles appearing in the gallery.
    (I'll retype the file names to make a decent caption)

  - If you want the images to appear in a specific order, then start the filename with the number of the thumbnail position that you want, e.g. 1spitting cobra.jpg.
    Images will appear in numerical or alphabetical order left-to-right.

- They will be put onto the web site without further alteration if they are :

  - JPEG

  - Not more than 600 pixels wide nor 400 pixels tall.

  - 72 pixels/inch resolution (Otherwise they don't display properly - I don't know why)

  - Each file size is less than 150 kb.

  - Saved in the sRGB colour space.
    Monochrome images can be in sRGB or greyscale.
    Adobe RGB is not suitable for web images – they'll look dull.

- If they are not as we need, I will either return them to you, or modify them before putting them into the gallery.

- E-mail the images as attachments, directly to me, at btmike.hynes@btinternet.com and I'll put them up as soon as I am able.

- Usually, one image from each gallery appears in the APS Home Page slideshow.

- Gallery images need to be refreshed after 12 months and will be deleted after 18 months.

- Contact me if you have any queries or need help.

Mike Hynes.
